Skill Set

- Languages: **Javascript**, **C++**, Java, Python
- Databases: PostgreSQL, **MongoDB**, MySQL, SQL, DynamoDB
- Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins
- Web Technologies: **React**, **Angular**, jQuery, **Node.JS**, Express.JS, **REST**, **GraphQL**, Spring, SCSS, HTML

Experience

Software Engineer Intern

Jun 2020 – Sep 2020

Pinwheel

Austin, TX

- Researched, designed, and implemented new back-end infrastructure simultaneously migrated from the old back-end infrastructure leading to a 40% increase in data-handling optimization.
- Revamped the existing **React** modules ground-up leading to 60% faster application loading time.

Software Engineer

Jun 2018 – Jun 2019

DMD Developers

Surat, India

- Developed modular **React** components with the help of **Redux** and **React Hooks**, achieving a 30% reduction in redundant code, leading to a clean and optimized codebase with a 45% faster loading time.
- Led smooth implementation of multiple data storage solutions and back-end infrastructure on **AWS** and **NodeJS**

Education

Northeastern University

Sep 2019 – May 2021

M.S. in Computer Science

Boston, MA

- Coursework: Database Management System | Algorithms | Software Engineering | Software Vulnerability & Security
- Graduate Teaching Assistant for CS 5610 Web Development (Grad Course)

SRM University

Jul 2014 – May 2018

B.Tech in Computer Science and Engineering

Chennai, India

- Published 2 Research papers

Projects

[TravelOPort](#)

- A comprehensive travel portal with secure user authentication and session management
- Developed the Full-Stack web application from scratch with MERN (**MongoDB**, **ExpressJS**, **React**, **NodeJS**) stack
- Supports multitiered user privileges along with per-user cookie based identification to deter XSRF attacks

[2D Game Engine Platformer](#)

- Designed and developed a 2D Game Engine that enables development of 2D games in an effortless manner
- Developed a side-scroller game off the 2D Game Engine with a dedicated Resource Manager and [Level Editor](#)
- Developed with: **C++17**, **Javascript**, **HTML**, **CSS**

[Collaborative Virtual Whiteboard](#)

- A cross-platform, decentralized **C++** based Whiteboard that allows multiple users to collaborate simultaneously in real-time. Supports multiple pen/brush sizes, changing canvas color along with undo, redo, and clear commands

Volunteer

Red Hat Campus Ambassador – Northeastern University

Vice President of Web Technologies – AI Skunkworks at Northeastern University
