

Jugal Joshi

 jugaljoshi.com  linkedin.com/in/jugalj05hi  github.com/jugalj05hi  joshi.ju@northeastern.edu

Skill Set

- Languages: **Javascript**, C++, Java, Python
- Databases: PostgreSQL, **MongoDB**, MySQL, SQL, DynamoDB
- Cloud & DevOps: **AWS**, Docker, Kubernetes, Jenkins
- Web Technologies: **React**, **Angular**, jQuery, **Node.JS**, Express.JS, **REST**, GraphQL, Spring, SCSS, HTML

Experience **Software Engineer Intern**

Jun 2020 - Sep 2020

Pinwheel

Austin, TX

- Spearheaded the research, design, and implementation of new back-end infrastructure(**Apollo**) while simultaneously migrating from the old back-end infrastructure(**AWS**) leading to a 40% increase in data-handling optimizations
- Re-engineered payment & checkout components to streamline the payment process with 25% faster checkout times
- Implemented automated-testing mechanism with **Cypress.js**, resulting in 60% reduction in testing times

Software Engineer

Jun 2018 - Jun 2019

DMD Developers

Surat, India

- Developed modular **React** components with the help of **Redux** and **React Hooks**, achieving a 30% reduction in redundant code, leading to a clean and optimized codebase with a 45% improved loading time
- Led smooth implementation of multiple data storage solutions and back-end infrastructure on **AWS** and **NodeJS**

Education **Northeastern University**

Sep 2019 - May 2021

Master of Science - Computer Science

Boston, MA

- Coursework: Software Engineering | Algorithms | Database Management System | Software Vulnerability & Security
- **Graduate Teaching Assistant** for CS 5610 Web Development (Grad Course)

SRM University

Jul 2014 - May 2018

Bachelor of Technology - Computer Science and Engineering

Chennai, India

- Published and presented research paper in Big Data domain at ICRDEST-2018 [ISSN: 1314-3395](#)

Projects

[TravelOPort](#)

- A comprehensive travel portal with secure user authentication and session management
- Developed the Full-Stack web application from scratch with MERN (**MongoDB**, **ExpressJS**, **React**, **NodeJS**) stack
- Supports multitiered user privileges along with per-user cookie based identification to deter XSRF attacks

[2D Game Engine Platformer](#)

- Designed and developed a 2D Game Engine that enables development of 2D games in an effortless manner
- Developed a side-scroller game off the 2D Game Engine with a dedicated Resource Manager and [Level Editor](#)
- Developed with: **C++17**, **Javascript**, **HTML**, **CSS**

[Collaborative Virtual Whiteboard](#)

- A cross-platform, decentralized **C++** based Whiteboard that allows multiple users to collaborate in real-time
- Supports multiple pen/brush sizes & colors along with undo, redo & clear commands over the network

Leadership

- **Red Hat Campus Ambassador** – Northeastern University
- **Vice President of Web Technologies** – AI Skunkworks at Northeastern University
